MESSAGE FROM LEADERSHIP

AHMED ELTYEB KHALIFA

Co-Founder & CTO

At AXIROVA, we combine AI, software engineering, and quality assurance to build secure, scalable, and reliable solutions designed for real-world impact and long-term growth.

ALTAYEB KHALIFA

Co-Founder & CEO

At AXIROVA, we turn technology into real business value. Our vision is to help organizations innovate, grow, and scale through intelligent, reliable, and future-ready digital solutions.

Build Smarter. Scale Faster.

WHO WE ARE

AXIROVA AI Solutions & Quality Assurance is a Dubai-based technology company built on a simple but powerful promise: practical, intelligent, reliable, and scalable digital delivery.

We are not just a software company — we are a strategic technology partner. From AI-powered automation to enterprise software and end-to-end quality assurance, we build solutions that solve real business challenges and grow with your ambitions. Rooted in the UAE and serving clients across the GCC and beyond, AXIROVA combines global engineering standards with deep local insight to deliver technology that works — every time.

Vision, Mission & Values

Innovation

We pioneer intelligent solutions that push the boundaries of technology, embracing AI and automation to solve real-world business challenges with creativity and precision.

Quality

Every product we deliver is built to the highest engineering standards. From code to deployment, quality assurance is embedded at every stage of our process.

Trust & Scalability

We build lasting partnerships grounded in transparency and reliability. Our architectures are designed to scale seamlessly as your business grows across the GCC and beyond.

Partnership

Your success is our mission. We work as an extension of your team, combining local UAE insight with global technology expertise to deliver outcomes that matter.

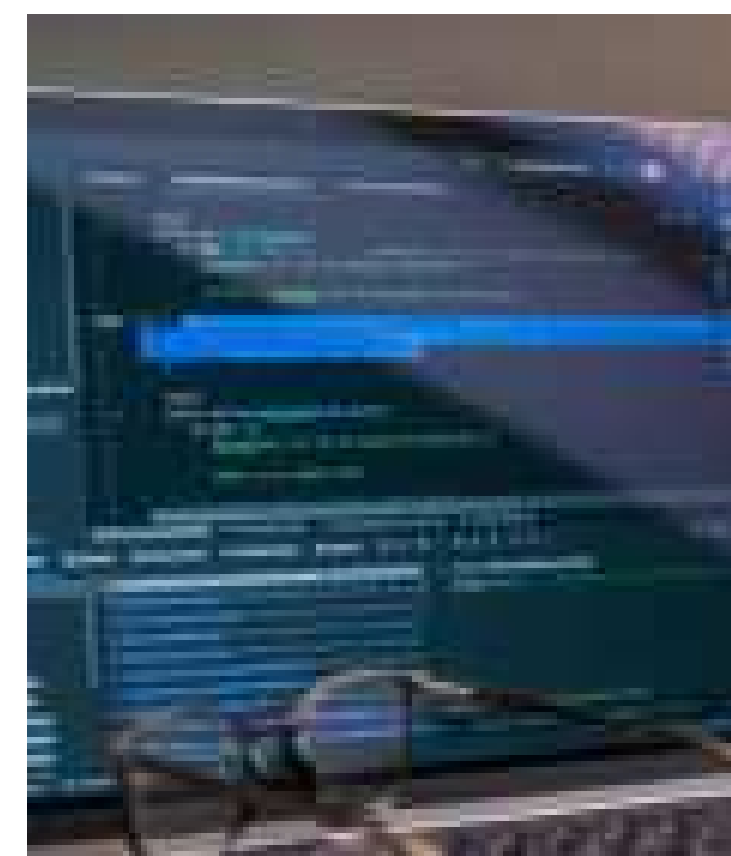

01 – AI & AUTOMATION

We use AI and intelligent automation to streamline operations, automate workflows, improve efficiency, and help businesses work smarter and faster.

02 – CUSTOM SOFTWARE DEVELOPMENT

We build tailored, scalable software solutions — including SaaS platforms, ERP, CRM, POS, and enterprise applications — designed around your business needs.

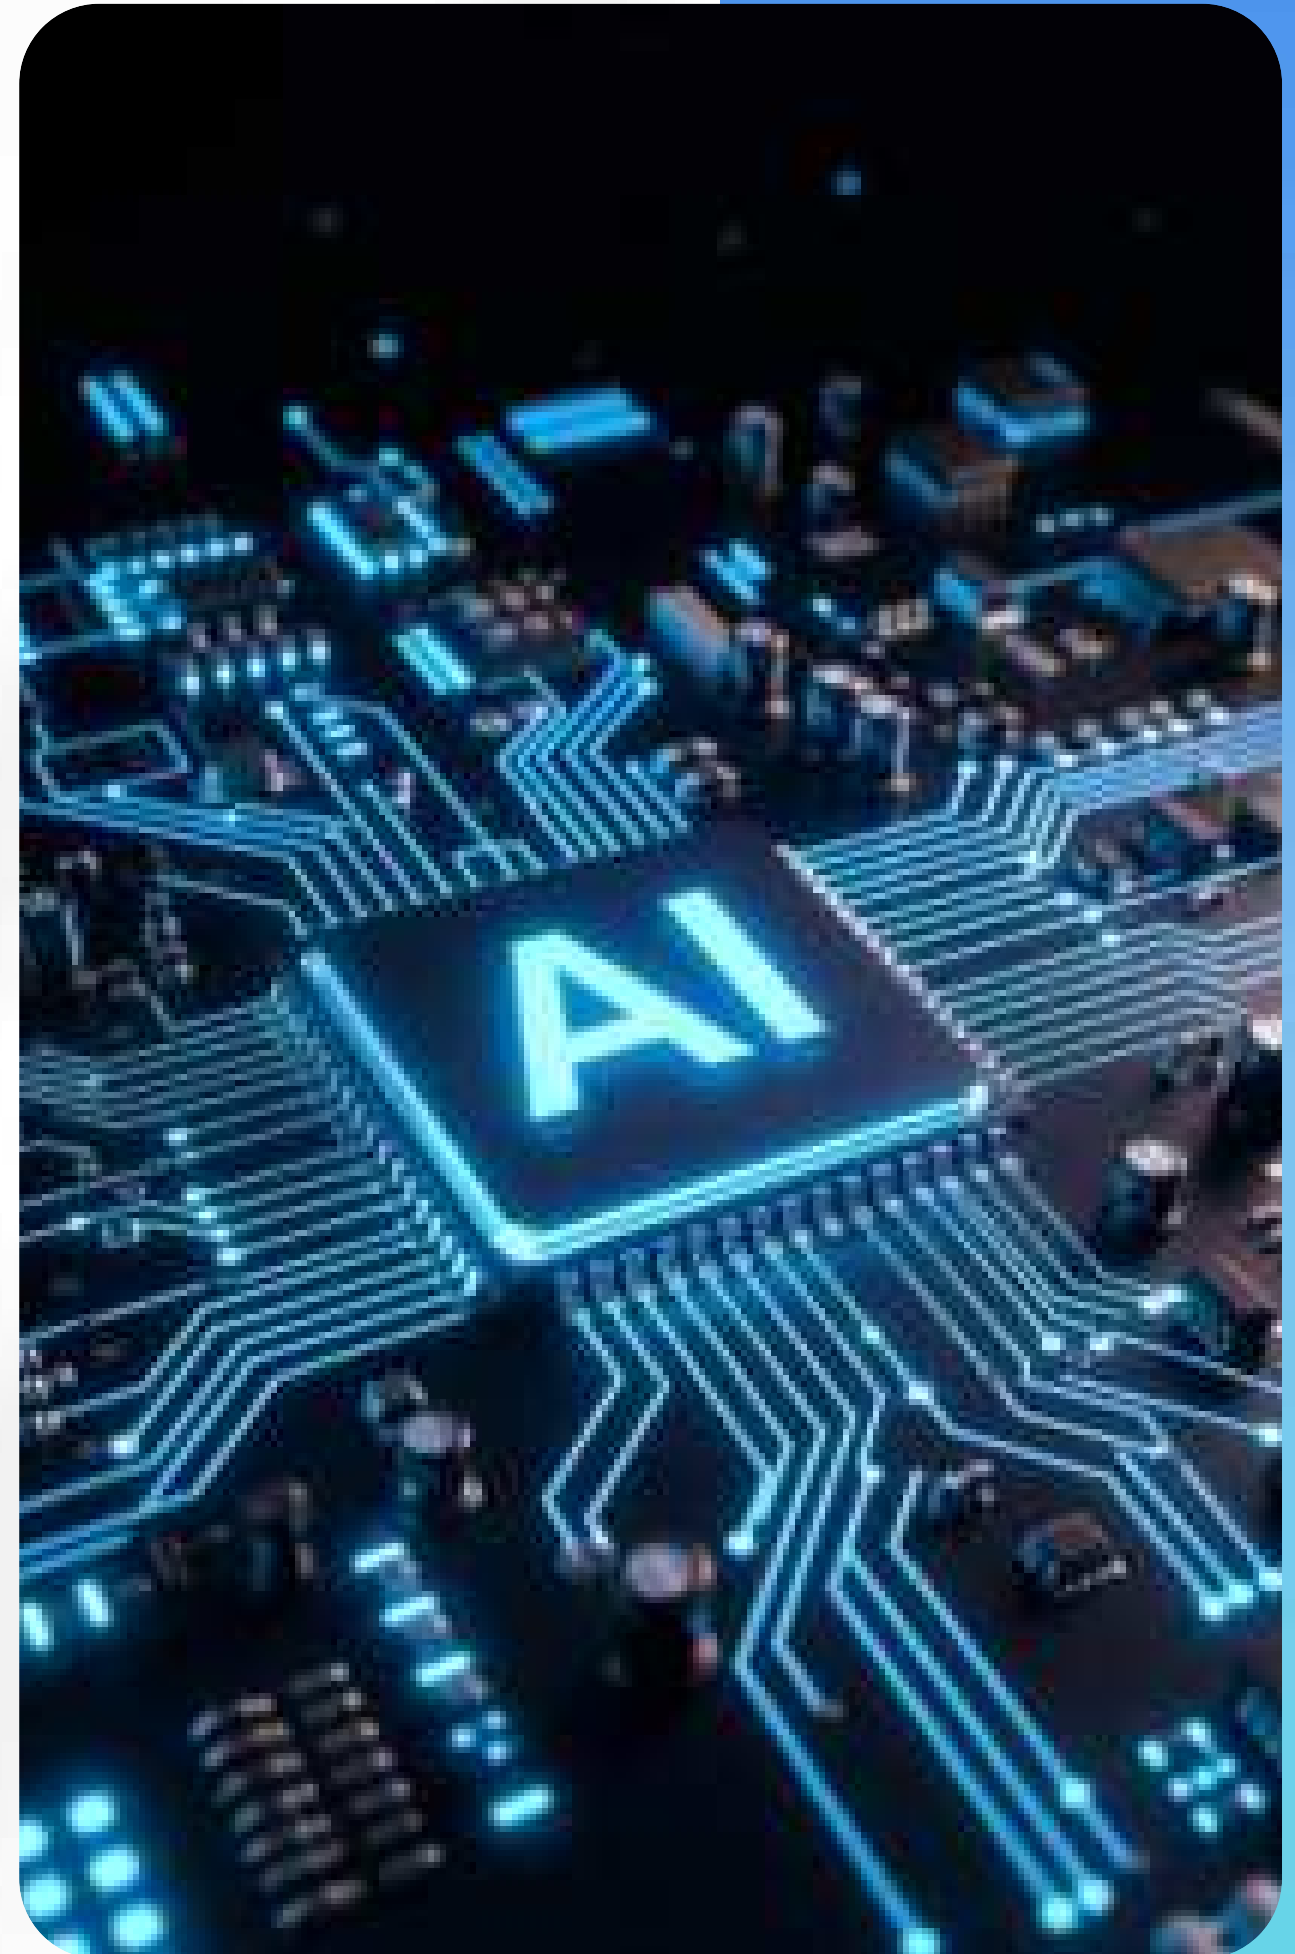

03 – QUALITY ASSURANCE & SOFTWARE TESTING

Quality is integrated into every stage of development. We provide functional, regression, API, performance, and automated testing to ensure reliable, secure, and high-quality releases.

AI SOLUTIONS

Our AI-powered solutions transform how businesses operate — automating repetitive tasks, enabling intelligent decision-making, and unlocking new levels of efficiency.

- **AI-Powered Workflows:** Streamline operations with smart automation that reduces manual effort and accelerates outcomes.
- **Intelligent Assistants:** Deploy AI chatbots and virtual agents that engage customers and support teams 24/7.
- **Business Automation:** End-to-end process automation across departments — from onboarding to reporting.
- **Intelligent Integrations:** Connect your systems with AI middleware that learns, adapts, and optimizes data flow in real time.

CUSTOM SOFTWARE

We design and build powerful, scalable software tailored to your business needs. From SaaS platforms to full enterprise systems, our solutions are engineered for performance and growth.

- **SaaS Platforms** — cloud-native, multi-tenant applications built for scale
- **ERP Systems** — unified operations across finance, HR, inventory, and logistics
- **CRM Solutions** — intelligent customer relationship and pipeline management
- **POS Systems** — seamless retail and hospitality point-of-sale platforms
- **Enterprise Applications** — robust, secure, and deeply integrated business tools
- **Every solution** is custom-built, not off-the-shelf — designed to fit your workflows and evolve with your business.

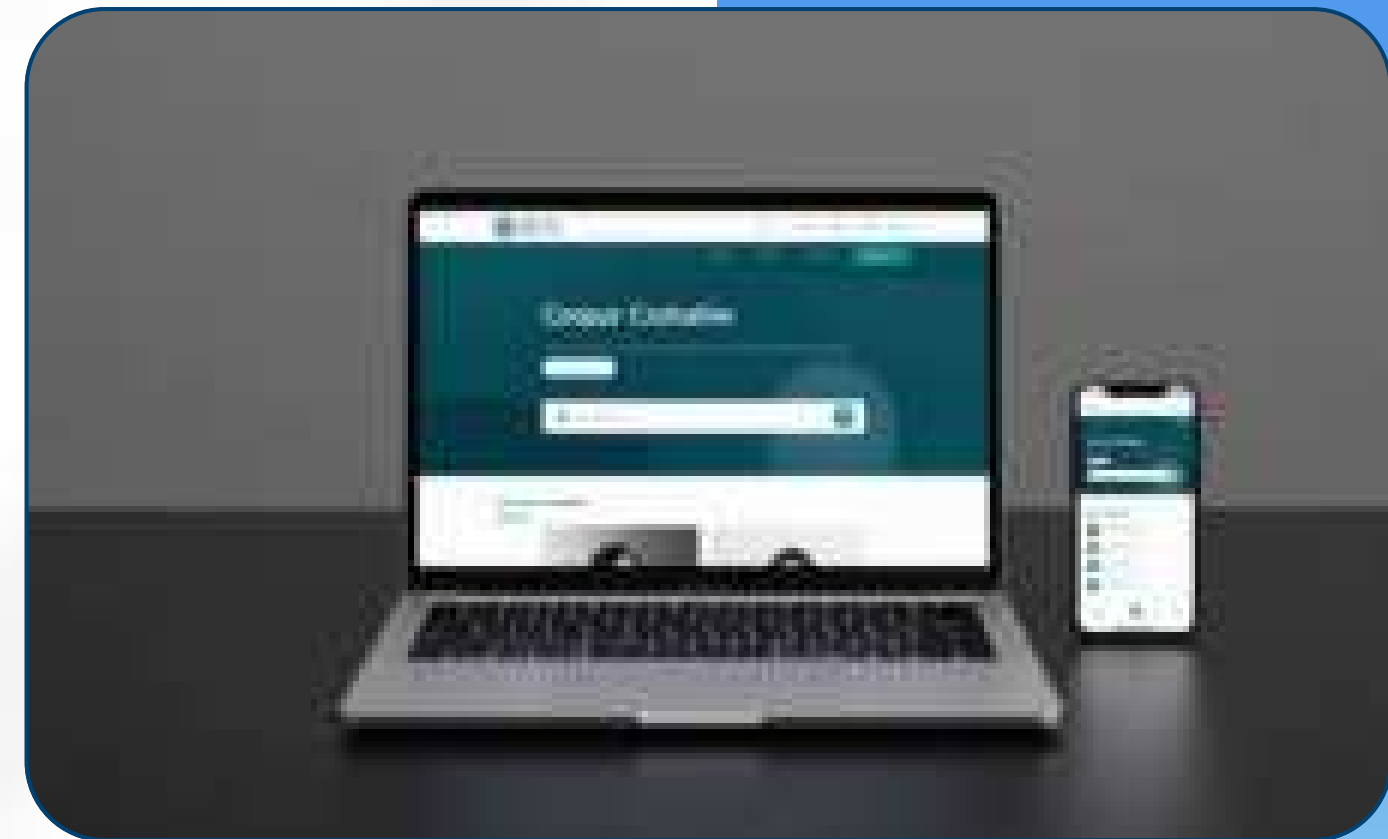

WEB & MOBILE

We design and build responsive web applications and mobile experiences that perform beautifully across every device. From sleek consumer-facing apps to complex enterprise portals, AXIROVA delivers digital products that are fast, intuitive, and scalable.

- **Responsive Web Applications**
- **iOS & Android Mobile Apps**
- **Progressive Web Apps (PWA)**
- **UI/UX Design & Prototyping**
- **Cross-Platform Development**
- **Performance Optimization**
- **Accessibility & Compliance**

Every product we ship is built with a mobile-first mindset, ensuring seamless user experiences from launch through growth.

APIS & INTEGRATIONS

We connect your systems, platforms, and data sources into one seamless digital ecosystem. AXIROVA designs and builds robust API architectures and third-party integrations that eliminate silos, automate data flow, and unlock operational efficiency. From REST and GraphQL APIs to ERP, CRM, and payment gateway integrations, we ensure every component of your technology stack communicates reliably and securely — enabling smarter decisions and faster execution across your entire business.

QUALITY ASSURANCE

At AXIROVA, quality assurance is embedded across every phase of the software lifecycle — not treated as an afterthought. Our QA practice ensures that every release is stable, performant, and ready for real-world use.

From requirements analysis to post-deployment monitoring, our QA engineers work alongside developers to identify risks early and eliminate defects before they reach production.

We deliver release confidence — so your teams can ship faster without compromising quality. Whether you are launching a new product or maintaining a complex enterprise platform, AXIROVA QA ensures every build meets the highest standards of reliability and performance.

QA Capabilities

Functional & Regression Testing

End-to-end validation of features and workflows. Automated regression suites ensure every release is stable, consistent, and defect-free across all environments.

API & Integration Testing

Rigorous testing of REST and GraphQL APIs, third-party integrations, and system connections to ensure seamless data flow and reliable service communication.

Test Automation

Scalable automation frameworks using Selenium, Cypress, Postman, and custom scripts. Continuous testing pipelines integrated into CI/CD for rapid, confident delivery.

Defect Management

Structured defect tracking, root cause analysis, and resolution workflows. Full lifecycle visibility from discovery to closure, ensuring quality at every release stage.

HOW WE WORK

Discover & Plan

We begin by understanding your business goals, users, workflows, technical environment, and project requirements. This creates a clear scope, priorities, and delivery roadmap.

Design & Architect

We translate requirements into user experiences, system architecture, workflows, and technical specifications — creating a clear blueprint before development begins.

Build & Iterate

Our engineers develop the solution in structured, iterative cycles, enabling continuous progress, collaboration, and flexibility as requirements evolve.

Test & Assure

Quality assurance is integrated throughout development. We validate functionality, APIs, integrations, performance, and critical user journeys before release.

Deploy & Launch

Once the solution meets agreed quality and acceptance criteria, we prepare and deploy the release with a controlled, structured launch process.

Improve & Scale

After launch, we gather feedback, monitor the solution, address improvements, and continue evolving the product as your business grows.

WHY AXIROVA

1

Business-First Thinking

Technology aligned with your goals, users, and measurable business outcomes.

2

Engineering Quality

Rigorous engineering and integrated QA ensure secure, reliable, release-ready solutions.

3

Scalable Architecture

Modular, cloud-ready systems designed to grow with your business.

4

Local UAE Insight

Regional understanding combined with global standards to deliver locally relevant, scalable solutions.

Industries

Retail & E-Commerce

Powering smart retail platforms, inventory automation, and seamless online shopping experiences for modern UAE consumers.

Hospitality & F&B

Digital solutions for restaurants, hotels, and hospitality brands — from booking systems to loyalty platforms.

Professional Services

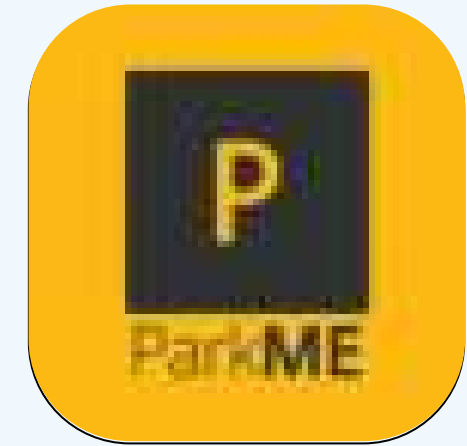

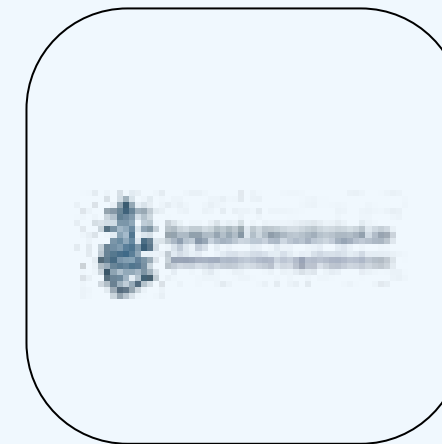

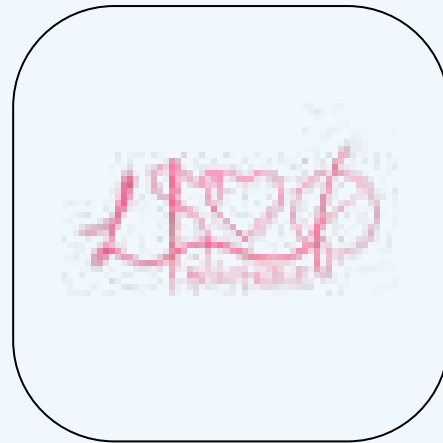

CRM, ERP, and workflow automation tools tailored for legal, consulting, and service-based businesses.

LegalTech & Marketplaces

Intelligent platforms for legal operations, multi-vendor marketplaces, and technical service providers across the GCC.

SELECTED WORK

1

Al Arabi Falcons

2

Hignal Khaleej

3

LOOF Boutique

4

Ismet Chef

5

OUNDA Technical Services

6

Mohamina

6

Flowrz

LOOF BOUTIQUE

Loof Boutique is a premium fashion retail brand for which AXIROVA delivered a fully integrated e-commerce platform with AI-powered product recommendations, inventory sync, and a seamless mobile shopping experience.

ISMET CHEF

Ismet Chef is a celebrated hospitality brand where AXIROVA built an end-to-end digital ecosystem — from reservation management and online ordering to loyalty programs and chef-branded content delivery.

OUNDA

TECHNICAL SERVICES

OUNDA Technical Services is a UAE-based technical services provider that partnered with AXIROVA to build a cohesive digital presence from the ground up.

AL ARABI FALCONS

Al **Arabi Falcons** is a UAE-based technical services provider that partnered with AXIROVA to build a cohesive digital presence from the ground up.

MOHAMINA

Two distinct digital ventures, one unified delivery standard. Mohamina is a LegalTech platform built to modernize legal service access in the UAE — enabling clients to connect with legal professionals, manage documentation, and navigate processes with clarity and confidence

Flowrz

Flowrz is a multi-vendor marketplace solution designed to empower sellers, streamline buyer experiences, and scale commerce operations. From vendor onboarding to order management and analytics, Flowrz delivers a complete digital commerce ecosystem.

Technology & Delivery Capabilities

Modern Tech Stack

React, Next.js, Node.js, Python, Flutter, and cloud-native frameworks power every solution we build — ensuring performance, scalability, and future-readiness across all platforms.

Cloud & Infrastructure

AWS, Azure, and Google Cloud deployments with CI/CD pipelines, containerized microservices, and DevOps practices that ensure 99.9% uptime and elastic scalability.

Security & Compliance

End-to-end encryption, role-based access control, OWASP-aligned security protocols, and data privacy compliance embedded across every layer of our delivery process.

Analytics & Integrations

Real-time dashboards, business intelligence tools, and seamless API integrations with ERP, CRM, payment gateways, and third-party platforms for connected operations.
